

## Summary

Pacific Aviation and network organizations have extensive experience with project management in the process of new aircraft interior coordination. Pacific Aviation has dealt directly with airlines, aircraft manufacturers, product suppliers/manufacturers, and interior designers in all aspects of interior outfitting, retrofitting and project management and coordination.

## Pacific Aviation Capabilities

Contracting with Pacific Aviation, our partner network organizations, airline customers are able to meet their specific requirements, meet their delivery schedules, and save cost at the same time.

### Cabin Configuration

Pacific Aviation and the partner network will meet with operator to determine aircraft specific requirements and compare to the aircraft manufacturer offerings. Specifically to determine First-Business-Economy seating, color schemes, establish the IFE requirements, as well as seating, galley, lavatory, entertainment systems, head racks, food services and accommodate special cabin requirements.

### Chief DER (FAA Designated Engineering Representative)

Pacific Aviation and partner organizations have worked for many years for airlines such as Lufthansa, Air New Zealand, Qantas, TWA, AirTran and others; having coordinated all aspects of new aircraft deliveries and provided all in service maintenance and cabin configuration changes.

### Coordination and Negotiation with Manufacturers

Pacific Aviation has coordinated and negotiated with manufacturers the purchases and follow up deliveries of interior equipment from the carpets to galleys, sophisticated IFE equipment (BFE equipment).

### Other Aircraft Interior Capabilities

- Product design and product development
- Mock up
- CAD services
- Program Management
